## Carbon dioxide

	<b>General information</b>	Provide medical assistance to those affected. People who dispense first aid are advised to wear personal protective equipment. There may be delayed effects on exposure.
	<b>Inhalation</b>	Move patient to fresh air and keep at rest in a position comfortable for breathing. Monitor for respiratory distress. If coughing or difficulty breathing, assess for airway irritation, bronchitis or pneumonitis. If able, administer supplemental oxygen with assisted ventilation as needed. Administer artificial respiration if the patient is not breathing.
	<b>Ingestion</b>	Ingestion is not considered a potential route of exposure.
	<b>Skin contact</b>	In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Cover the irritated skin with an emollient. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse.
	<b>Eye contact</b>	Immediately remove contact lenses and flush eyes with plenty of lukewarm water for at least 15 minutes. If irritation, pain, swelling, excessive tearing or sensitivity to light persists, the patient should be seen at a health centre and referral to an ophthalmologist should be considered.
<b>4.2</b>	<b>Most important symptoms and effects, both acute and delayed</b>	
	<b>Eye contact</b>	Redness. Pain. Severe deep burns.
	<b>Inhalation</b>	At high concentrations may cause asphyxiation. Symptoms may include loss of consciousness or mobility. Victim may not be aware of asphyxiation. Small concentrations of CO <sub>2</sub> cause increased respiratory rate and headache.
	<b>Skin contact</b>	No significant effects or critical hazards are known.
	<b>Ingestion</b>	Ingestion is not considered a potential route of exposure.
<b>4.3</b>	<b>Indication of any immediate medical attention and special treatment needed</b>	
	No action involving personal risk or without adequate training should be taken. Avoid direct mouth-to-mouth resuscitation, as it can be dangerous for the person providing the help. Use other methods for resuscitation, preferably oxygen or compressed air equipment. Treat according to the following indications:	
	<b>Notes to physician</b>	Treat symptomatically.
	<b>Specific treatments</b>	There is no specific treatment. It depends on specialized medical observation.
<b>SECTION 5</b>	<b>Firefighting measures</b>	
<b>5.1</b>	<b>Extinguishing media</b>	
	The product is not flammable.	
	<b>Suitable extinguishing agents</b>	Water haze

## Carbon dioxide

	<b>Unsuitable extinguishing agents for safety reasons</b>	High volume water jet.
<b>5.2</b>	<b>Special hazards arising from the substance or mixture</b>	
	Containers may explode in case of fire: use water spray to cool containers without opening them.	
	<b>Hazardous thermal decomposition products</b>	Hazardous combustion products: CO, CO <sub>2</sub> .
<b>5.3</b>	<b>Advice for firefighters</b>	
	<p>Open warehouse doors and windows for maximum ventilation.</p> <p>Fire-fighting personnel should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face mask operating in positive pressure mode. Clothing for fire-fighting personnel (including helmets, protective boots) should conform to European standard EN 469 and gloves to EN 659. It should provide a basic level of protection for chemical incidents and should be fire resistant. The facility shall have sufficient protective equipment available to deal with fires.</p>	
<b>SECTION 6</b>	<b>Accidental release measures</b>	
<b>6.1</b>	<b>Personal precautions, protective equipment and emergency procedures</b>	
	Wear protective clothing.	
	<b>For non-emergency personnel</b>	
	<p>Do not breathe vapors or spray mist. Avoid contact with skin, eyes and clothing. In case of non-flammable spills and leaks, wear vapor protective clothing. Stop leak if you can do so without risk. Keep unnecessary persons away, isolate the danger area and prevent entry. Eliminate sources of combustion.</p> <p>Keep upwind, out of low areas and ventilate confined spaces before entering. Assess the affected area to determine if evacuation is necessary. If it is necessary to evacuate the danger zone, you should follow the advice of an expert. If sheltering in place, tape windows and doors, close outside air intakes (attic fans, etc.) and place a damp towel or cloth over your face (if necessary).</p>	
	<b>For emergency responders</b>	
	With proper training, self-contained breathing apparatus (SCBA) and protective clothing for structural firefighters used in conjunction with water spray will provide limited protection in outdoor emissions for short-term exposure.	
<b>6.2</b>	<b>Environmental precautions</b>	
	In case of accidental spills and leaks avoid dispersal of spilled material, runoff and contact with soil, watercourses (surface and groundwater), drains and sewers. Inform the competent authorities if the product has caused adverse impacts (sewers, watercourses, soil or air).	
<b>6.3</b>	<b>Methods and material for containment and cleaning up</b>	

## Carbon dioxide

	In case of accidental spills and leaks, avoid dispersal of spilled material. Use water spray or foam to control vapors. Make a protective barrier and ensure closure of drains with suitable containment material. Absorb with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Sweep and shovel into suitable containers for disposal.	
<b>6.4</b>	<b>Reference to other sections</b>	
	See Section 1 for information on contact in case of emergency. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.	
<b>SECTION 7</b>	<b>Handling and storage</b>
